

Get a Grip on Your Wave Zone Grating.

StormGrip™ System

The StormGrip System is an attachment system designed to prevent washout of wave zone grating even in typhoon and hurricane conditions. The system is secured by a stainless-steel “claw” around the perimeter of the grating and a series of recessed stainless-steel plates mounted down the center of each panel. Our fully engineered and fabricated system that provides a long-term, cost-effective solution for tough wave zone areas as well as the industry’s best washout warranty.

The StormGrip System is not only a specialized attachment system, but comes with the added assurance of quality fiberglass reinforced plastic (FRP) grating from the inventors of molded grating. Fibergrate Composite Structures has been manufacturing molded grating since 1966 and providing grating to the offshore market since early 1970s. Fibergrate’s FRP molded grating and stair treads are corrosion and slip resistant providing the safest solution for the slick wave zone area.

Why Use the StormGrip System?

- Proven Effective Attachment System
- Warranted Against Washout (see warranty on reverse)
- Safe, Slip-Resistant Surface
- Cost-Effective, Long-Term System
- UV and Corrosion Resistant FRP Molded Grating
- Can be Retrofitted for Existing Platforms
- Removable for Maintenance
- The StormGrip System Includes Guaranteed Quality Products
 - Fibergrate FRP Molded Gratings
 - All 316 Stainless Steel Attachment Hardware
 - Hilti Brand Fastener Option for Added Ease of Installation

Fibergrate Job No. yymmnn

Fibergrate Composite Structures Inc. provides this warranty to *Your Company* for an installed StormGrip System with square mesh molded grating and attachment system provided the following terms and conditions are met:

1. Fibergrate must prepare all drawings and details for the project; and
2. Fibergrate must provide all materials including FRP molded grating and attachment hardware for the StormGrip System; and
3. Fibergrate must install the StormGrip System or if installation is performed by *Your Company* or its subcontractors Fibergrate must inspect the installation for approval; and
4. Fibergrate must be offered offshore access to the platform by *Your Company* to perform a Final Project Review after the jacket and all components of the grating system have been installed. At the expense of *Your Company*, Fibergrate is allowed to make all alterations required to approve the StormGrip System; and
5. The StormGrip System signed warranty is initiated with an approved Final Project review and payment in full for the project is received by Fibergrate.
6. If a claim is made for loss of grating due to wave action, Fibergrate must be provided access to the offshore platform to verify the circumstances of the grating loss were caused by Fibergrate's design and/or installation.

If items one through five of this warranty are met and a review determines that Fibergrate's design and/or installation caused said loss, Fibergrate will provide replacement materials and offshore labor to restore the system at no charge to *Your Company*. Replacement materials include all molded grating and attachment hardware. All transportation from the shore base to the platform of materials and labor for repair is to be provided by *Your Company*.

The term of this warranty is for a period of three years commencing with an approved Final Project Review. Please contact Fibergrate's corporate office should *Your Company* wish to extend the warranty beyond the three year term and Fibergrate's engineer/technicians will be required to perform a Warranty Review of the installation. *Your Company* would be required to supply the transportation from shore base to the platform for this review. Any items in need of repair at time of Warranty Review should be repaired to warranty standards at *Your Company's* expense and Fibergrate will extend this warranty for another three year term. This warranty can be extended on three-year intervals for a maximum of five times with a required Warranty Review as previously outlined for each extension request. Costs related to Final Project Review and Warranty Reviews and repairs required for warranty initiation will be invoiced by Fibergrate at prevailing rates at time of work.
