DynaRound Slimline Warning Lines

HEAVY-DUTY (HD) WARNING LINES

This permanent warning system includes heavy-duty base plates, plastic coated cable and rigid, plastic pennants. The heavy-duty stanchions and bases are designed to withstand years of use. The standard system includes 3 stanchions, 3 bases, and 100 feet of cable with plastic flags.

LIGHT-DUTY (LD) WARNING LINES

Create a safe-zone using the LD Warning Line System. Generally used for temporary warning line applications, our LD system features folding stanchions with a nylon line and vinyl flags that can be set up quickly. The lightweight folding stanchions and flagged nylon cord can be installed easily. Add the optional transporter for the ultimate in storage and portability. Typical installation for warning lines requires lines be placed a minimum of 6 feet from hazard for construction applications. (See your individual state OSHA regulations for compliance.)

SPECIFICATIONS

Safety Ratings

OSHA Requirements:
- 1926.501(b)(10)
- 1910.28(b)(8)(ii)
- 1926.502(f)
- 1910.29(d)

OH&S
- R.R.O. 1990, Reg. 851, s. 85 (b)(i)
- Alberta OSHA 2009
  - Section 161

Features and Benefits

- Permanent warning line system used for visual warning of at-risk areas
- Uses heavy-duty, galvanized, weighted bases; steel cable; and rigid, plastic pennants
- Stanchions and bases can be purchased individually for non-linear installations requiring multiple turns.

Components

Set up with a Base Plate Every 25’ with Pennants

Standard kit includes:
- 3 - 42” Stanchions
- 3 - Base Plates
- 100’ of Plastic Coated Cable

Features and Benefits

- Foldable warning line system used for visual warning of at-risk areas
- Standard system includes 3 folding bases and 100 feet of flags
- Optional transporter holds up to 9 folding warning line systems
- Optional rubber feet attachments

Components

Standard Kit Includes:
- 3 - 39.5” Tall Stanchions, 48”x45” Footprint, 36 lbs
- 100 Feet of Nylon Flagged Line with Flags Every 5’
- Nylon Cord Rated at 657 lbs. Tensile Strength
ADDITIONAL ROOF SAFETY SOLUTIONS by Fibergrate

DYNAROUND RG™ (ROOF GUARD)
DynaRound RG™ Roof Guard ballasted rooftop guardrail system is designed for safety and fall protection on roof top applications. Each system is made up of durable, corrosion-resistant fiberglass reinforced plastic (FRP) composite uprights and non-FRP counterbalance weights and connector components. DynaRound RG provides the utmost in safety by protecting against injuries or death from accidental falls from the roof. This system meets all applicable safety standards in the U.S. and Canada to protect individuals on rooftop surfaces.

DYNAROUND RG SLIMLINE™ (ROOF GUARD)
Fibergrate’s new ballasted rooftop guardrail system, DynaRound RG Slimline™, provides safety and fall protection on rooftop applications with fewer counter balance bases than DynaRound RG. Similar to our DynaRound RG system, each Slimline system is made of durable, weather-resistant fiberglass reinforced plastic (FRP) composite uprights and rails, galvanized steel base weights, and galvanized connector components. This system meets applicable safety standards in the U.S. and Canada to protect people working at heights.

DYNAROUND HATCH GUARD
DynaRound Hatch Guard provides a non-penetrating guard solution for safe entry and exit through roof access hatches. The adjustable self-closing gate prevents accidental entrance when the hatch is open. The DynaRound Hatch Guard mounts directly to the roof hatch with a compression fit design so no drilling is necessary which means the rooftop waterproofing system is not compromised.

CORVEX® MOLDED GRATING WITH RUBBER FEET
Molded Walkway Grating is made with a unique Corvex® resin system that outperforms many competitive fiberglass and metal products. Our molded grating is corrosion resistant, lightweight, slip resistant, and easy to install. Specially designed rubber feet can be added, elevating the molded grating 1/2” above the surface, offering an economical raised walkway solution, for use around maintenance equipment, machines, wet areas, and rooftop walkway areas.

FRP DYNA RAIL® SAFETY LADDERS
DynaRail® Safety Ladder Systems combine a corrosion resistant, low maintenance design to ensure a long life cycle. Ladder rungs include heavily serrated flutes for slip resistant footholds that are easy on the hands while ensuring safety. Our system is designed and manufactured to be easily installed with no guesswork involved. Components are lightweight and easy to fabricate, which saves you on labor and equipment. UV inhibitors in the resin along with a secondary UV coating maximizes protection from the effects of UV weathering. The DynaRail safety ladder system meets or exceeds all OSHA requirements.

CROSSOVERS
Our FRP Crossovers provide a pre-engineered, corrosion and slip resistant solution for your rooftop. Available in a variety of heights that address most standard clearances, these Crossovers create a cost effective and safe solution over many rooftop obstructions. The crossover systems create a safe working environment, are lightweight and easy to install. Designed to meet all applicable safety standards in the U.S. and Canada.

STAIR SOLUTIONS
Fiberplate® slip molded FRP stair treads can be used for both new or replacement steps. Treads are engineered to exceed OSHA and other model building code standards for safety, strength, durability and corrosion resistance. Fiberplate® stair tread covers are a convenient way to provide solid, slip resistant footing for existing wood, concrete, metal or FRP treads that are still structurally sound.

DYNAROUND SLIMLINE WARNING LINES
DynaRound Slimline Warning Lines are available in a heavy and light duty design. Our heavy-duty warning line systems can be used as a permanent warning system with heavy-duty galvanized base plates, plastic coated steel cable, and plastic pennants. The heavy-duty stanchions and bases are designed to withstand years of use. The standard system includes 3 stanchions, 3 bases, and 100 feet of plastic coated steel cable with flags. Our light duty warning line system can be used as a temporary warning system. This system includes three folding stanchions, 100’ of nylon flagged line. Both systems meet all applicable safety standards in the U.S. and Canada to protect individuals on rooftop surfaces.

DYNaweight FALL PREVENTION SYSTEM
DynaWeight Fall Protection System is the perfect solution for fall protection when circumstances require non-penetrating versatility. This system is tested and approved for use on flat rooftop surfaces (single ply, BUR, concrete, and modified bitumen membranes), with a maximum incline of 5 degrees. It provides tie off options for 2 people if used for fall restraint or 1 person for fall arrest, sets up quickly, and is easy to move. The DynaWeight Fall Protection System is corrosion resistant and meets all applicable safety standards in the U.S. and Canada to protect individuals on rooftop surfaces.
